We collaborate with our clients to assist them in successfully reaching new objectives, initiatives, and strategies. We work one-on-one with our clients to identify areas of improvement with their business and with how they are utilizing technology as a tool..

Why Use Vertigo / Group?

First, let us say we are a small consulting firm and

proud of it! One of the most important aspects of our business model is our size. Unlike many of the larger consulting firms, Vertigo Group prefers to keep things simple and manageable, and free from conflicting interests through maintaining independence from vendors. This allows us to meet our clients' needs without being over extended.

Our clients have direct access to Vertigo Group's principals, and we pride ourselves on being a small fish in a very large pond. We do not write long, complicated proposals. We get right to the point and provide simple, easy to understand proposals that focus on results. We trust our work and let our work speak for itself.

We are responsive, dependable, and proactive.

Simplicity: We Don't Know Any Other Way

Our goal is to simplify office technologies, organizational processes, departmental workflows, and group dynamics.

We work with clients to identify areas of improvement with how they are using technology as a tool. We look at a business as an integrated, cohesive whole. This means we bring a strategic mindset to everything we do. We start by defining the right questions. Then we dig deep into the numbers, as the basis for creating solutions.

We bring years of experience, we put ourselves in our clients shoes, and develop creative solutions. Any system that requires in-depth training is a failed system. Our solutions are easy to follow and we attempt to make use of existing hardware/software.

We pride ourselves on being able to simplify any process or system and bring small groups together.
